- Developed multiple full stack javascript webapps that automatically allocates tips, calculates tip credit, and determines employee healthcare eligibility for ADP Hawaii's clients. Currently working on expanding to more clients of ADP.

Fiverr
Freelance Web Developer

Mar 2017 – Jan 2019
Remote

- Created 30+ different applications, websites, and chrome extensions for customers on fiverr.com

SKILLS

- Programming Languages (Proficient): Javascript, node.js, HTML/CSS, Python
- Programming Languages (Competent): Java, Ruby on Rails, C
- DB Management Systems: MongoDB, PostgreSQL

PROJECTS

Dominos Pizza & MBC Tip Allocation Program <https://mnysoftware.com/secureupload>
Created a webapp for ADP using node.js, MongoDB, and python that uses raw employee data to automatically distribute tips and generate payroll sheets for Dominos Hawaii and Maui Brewing Company.

This Tab <http://www.this-tab.com/>
Developed a website using Ruby on Rails that allows users to donate money generated by viewing new tabs with Google Ads to charities of their choice.

Punahou Student Hub <https://punahoustudenthub.com/>
Worked with two other high school classmates to create a webapp for our school that allows students and faculty to view and post announcements, events, clubs, and schedules using Ruby on Rails.

Online Capture The Flag <https://ctf.andyluyoung.com/>
Developed an online real-time multiplayer capture the flag game using node.js and socket.io.

OP.GG Search (4,000 Current Users) <https://chrome.google.com/webstore/detail/opgg-summoner-search/dfnoddgekoeiljeakobnchnedoipgpc?hl=en>
First fully completed personal chrome extension with 4,000 current users made with javascript.
